

*Caring as One*

## Care For Your Employees and Your Business

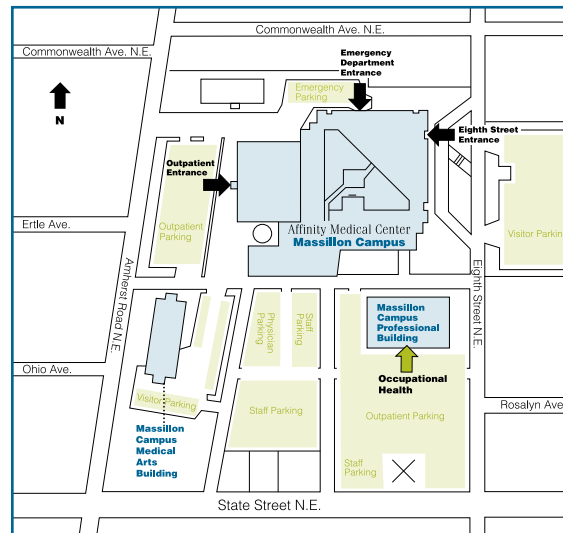

As a business professional, you understand the delicate balance between providing your employees with high quality, comprehensive healthcare services and controlling expenses. With Affinity Occupational Health, you can do both.

Our professional staff helps businesses in Western Stark County and the surrounding areas to care for employees while complying with national and state regulations and controlling workers' compensation costs.

## Prevention is the Key

Injury prevention is essential to maintain control over both quality and cost of treatment. Through greater emphasis on preventive measures and increased employee education, Affinity Occupational Health works to eliminate lost productivity due to injury. To minimize lost time when an injury does occur, plans to return the injured employee to productivity begin on the first day of disability.

*Tours of the facility are available during regular business hours, Monday through Friday, 7 a.m. to 5 p.m.*

## Healthcare Made to Order

We work with you to create a healthcare program tailored exactly to your business needs. The staff at Affinity Occupational Health is trained to help employers comply with all applicable rules and regulations relevant to workers' compensation, the Occupational Safety and Health Administration and the Department of Transportation, among others.

## Protection Around the Clock

Sometimes an employee hurt at work may need medical attention beyond first aid. To protect the company's best interests, it is good practice to send the individual to Affinity Medical Center for an initial evaluation, even if no injury was reported.

In all cases of acute trauma, including head injury, employers should urge same day medical attention. Employees with major injuries or illnesses should be transported via EMS to Affinity Medical Center. Our experienced team of physicians, nurses and support staff work together to provide your employees with expert healthcare services.
